

For this activity you are in one of three groups. Each group is listed below with the three terms that you and your group are responsible for. For your three terms each person needs to find a definition for each term and post it in the glossary named “**Geometry Terms**”. Each term is already listed there. Go in and edit the term and put your definition in. There should be a definition from each group member for each term. Once you have put your definitions in go and look at the other six terms to see what they mean. When you have completed this activity go through the prez.

Group 1	Group 2	Group 3
Point	Line	Plane
Collinear	Coplanar	Line Segment
Congruent	Midpoint	Ray
